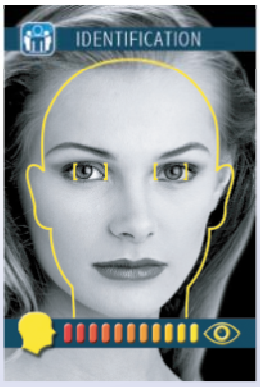
FaceSCAN®

IR Facial Recognition

IR-based Embedded Facial Recognition System

FaceSCAN®, the new generation of facial recognition system, authenticates users under a second with 99.9% accuracy*

FaceSCAN ® is a truly embedded facial recognition system designed for Access Control, Time & Attendance, and User Authentication applications. Powered by advanced video capturing, system design and Near-Infrared (NIR) facial recognition technologies, FaceSCAN provides superior accuracy and reliability over traditional facial recognition systems under different light conditions.



CONVENIENCE
user just look into FaceSCAN for authentication

CONTACTLESS
no physical contact is required

EASY TO USE
quick user enrollment and simple user training

COMPATIBILITY
easy integration with card reader and security system

USABILITY
accommodate different facial positions and poor lighting conditions

Jantek

– leading facial recognition solutions provider

Applications of FaceSCAN®

Superior Accuracy and High Throughput
- 99.9% accuracy* (* at default threshold)
- Authenticate users in < 1 second
- Differentiate between identical twins

Compatibility
- Work with cards, PINs and access controller
- Support different communication protocols (TCP/IP, standard & proprietary Wiegand, RS-232 and more)

Self-Contained System
- Embedded platform with built-in processor and memory
- No external computer/controller is needed for operation
- Low failure rate and Total Cost of Ownership

Easy-to-Use
- Completely contactless, no need to press any keys
- On-screen graphical display to assist user positioning
- Support remote controller to simplify standalone mode operation

Easy Installation
- IP-based, less cables and components to install
- Interface directly to existing card reader, access panel, electric gate, turnstile and other devices

Ready for Demanding Requirements
- Store up to 64,000 user facial templates internally
- Handle high volume authentication transactions
- Work up to 10,000 Luxs light condition

FaceSCAN® System Applications

Time & Attendance, Access Control and User Authentication
Sample Installation Sites:

- Airport
- Bank
- Business cooperation
- Construction site
- Factory
- Government building
- Gym
- Lab
- Prison
- Residential apartment
- School
- Warehouse

FaceSCAN® System Performance Specifications

Techology	NIR Facial Recognition Technology
User Enrollment Time	< 10 seconds
User Verification Time	< 1 second
False Acceptance Rate	< 0.001% at dafault threshold
False Rejection Rate	< 0.5% at default threshold
User Post Tolerance	15 degrees for Tilt, Yaw and Roll
Verification Methods	Card/PIN & Facial, Card/PIN & Photo
Operation Modes	Standalone, Network, Internet/ WIFI
SDK	Software Development Kit available

JPB-015 Remote
for Standalone Programming

FaceSCAN® System Reseller

Other Features

- Function even in dimmed condition or complete darkness
- Support users with glasses
- Not affected by background distortion
- High tolerance to changes in hairstyle, scars, beard & make up

FaceSCAN® System Specifications

Dimension	3.2" (W) x 3.5" (D) x 6.9" (H) 84 (W) x 88 (D) x 174 (H) mm
Weight	500g
Power Supply	12VDC, 1Amp
Tamper Alarm	Built - in tamper switch
Network	1 x RJ-45
Digital I/O	2 Input (door sensor, exit switch), 2 Output (relay, alarm)
Wiegand Interface	1 x Input , 1 x Output
Serial Interface	RS 232, RS 485
Network Protocol	TCP/ IP, DHCP, HTTP, NTP, HTTPS
Communication Protocol	Wiegand 26/34 bit, Proprietary Wiegand (e.g. 37 bit)
Operating Temperature	32 to 122 degree F 0 to 50 degree C
Operating Humidity	20 - 95 % relative humidity
Regulatory Compliance	FC CE RoHS

Optional:

FPR-200K Prox Reader/ Keypad

JPB-71 Contactless Exit Button

Read Range: Up to 5" from hand
(Up to 30ft from JPB-015 Remote)
